Cost of no server, by protocol (T = 10,000)
flood relay (code, E23)
synchronised epochs (proved)
epochs, pipelined (not proved)
extra regret over the server (paired)
graph diameter D (N = 16)
Trigger threshold under flooding
flood relay (code, E23), torus
synchronised epochs (proved), torus
flood relay (code, E23), ring
synchronised epochs (proved), ring
√(1+Nγ) of Theorem 17 (scaled)
regret ÷ regret at γ = 0.5
N·γ
Communication (same accounting)
flood relay (code, E23)
synchronised epochs (proved)
epochs, pipelined (not proved)
server
scalars sent
graph diameter D
