Across graphs (N = 16, T = 10,000, K = 20)
flood relay (run in E23)
published-only relay, γ = 0.5
published-only relay, γ = 1/(2N) (proved)
synchronised epochs (proved)
extra regret over the server
average farness F = Σ_k dist(i, k)
Horizon (ring): flat is predicted
flood relay (run in E23)
published-only relay, γ = 1/(2N) (proved)
synchronised epochs (proved)
extra regret over the server
N·T
Number of arms (ring)
flood relay (run in E23)
published-only relay, γ = 1/(2N) (proved)
synchronised epochs (proved)
extra regret over the server
arms per round K
