quadratic: same N·T = 160,000 pulls
1 agent, horizon N·T
N agents, sync every round (N=16)
N agents, event-triggered (γ=0.5) (N=16)
N independent agents (N=16)
cumulative network regret
total pulls in the network
Final regret at fixed N·T
1 agent, horizon N·T
N agents, sync every round
N agents, event-triggered (γ=0.5)
N independent agents
final network regret
N (agents)
zigzag: same N·T = 160,000 pulls
1 agent, horizon N·T
N agents, sync every round (N=16)
N agents, event-triggered (γ=0.5) (N=16)
